THE REPORT
OF THE
PRESIDENT OF QUEEN'S COLLEGE, BELFAST,
FOR THE
YEAR 1906-1907.

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

In pursuance of the duty required of me by the Colleges Act (8 & 9 Vict., cap. LXVI., sec. 20), I have the honour to present to Your Majesty my annual Report on the condition and progress of Queen's College, Belfast, during the academic year 1906-7.

The session was a particularly busy one, and I am glad to be able to say that the College continues to prosecute with vigour and success the task committed to it long ago by the Royal Charter under which it was founded.

The Professors who served with me on

THE COUNCIL

which governed its affairs during the year, bestowing time, unremitting labour, and careful thought to its large and constantly increasing business, and whose earnest efforts on its behalf were of the greatest assistance to me in its government, were—

Professor Dill, Litt.D., LL.D.

Professor Sir William Whitla, M.D., LL.D.

Professor Letts, D.Sc., Ph.D.

Professor FitzGerald, M.I.C.E.

Professor Morton, M.A.

Professor Symington, M.D., F.R.S.

THE PROFESSORiate.

During the session no change in the Professoriate took place, but, while this report was passing through the press, a member of our body, Mr. Thomas Wilson Dougan, M.A., Professor of Latin, was suddenly and most unexpectedly stricken down. He had occupied the chair for about a quarter of a century, having been appointed to succeed the late Professor Nesbitt in 1882. He

was an eminent Latin scholar, a most diligent and successful teacher, a painstaking and accomplished examiner, and a most useful member of our Library Committee. Two years ago the first volume of an erudite edition of the *Tusculan Disputations*, on which he had long been engaged, and for which he had examined and collated all the available MSS., was issued from the Cambridge University Press, and received with much favour by the learned world. With the second volume he was well advanced, but the pen has, alas! dropped for ever from the skilful hand.

I have to report the following

ADDITIONS TO OUR STAFF:—

Mr. W. J. Wilson, B.A., M.B., B.Ch., D.P.H., a distinguished *alumnus* of our own, appointed Joint Lecturer on Medical Jurisprudence; Mr. Andrew Duncan, M.A., B.Sc., and Mr. F. Balfour-Browne, M.A., F.R.S.E., Assistants in the Natural History Department; Mr. R. M. Henry, M.A., Reader in Ancient Classics; Mr. T. J. Anderson, Assistant in the School of Engineering; Mr. S. J. Crawford, B.A., Assistant in the English Department; Mr. James R. Riddell, B.A., Purser Assistant in Mathematics; Dr. Howard Stevenson, Assistant in the Department of Surgery; and Dr. C. G. Lowry in that of Midwifery. In all, seven of these gentlemen are old Queen's men.

There is none of the many advances, which the College has made in recent years, on which I look with more satisfaction than the increase in the number of the teaching staff, as indicated in these appointments. The staff is now much larger than it ever was before. Subjects which in former days were linked with others under a single professor, with all the resultant disadvantages of such an arrangement, have now been constituted units, and placed in charge of special teachers, each an expert in his own branch. The advantage of this change to research and the interests of education can scarcely be exaggerated. Further progress still requires to be made in the same direction; but the nature and importance of the advance which has been already gained may be gathered from the fact that, whereas twenty years ago the entire teaching staff of the College consisted of twenty members, it now numbers no less than forty.

During the year we had to deplore the death of one of the ablest and most promising of the juniors of our body, Dr. R. A. L. Graham, Demonstrator in Pathological Neurology. Almost at the outset of a career that promised to be one of singular usefulness and brilliance, he was suddenly cut down, to the great loss of the College, and the inexpressible grief of all who knew him.

The work of the Faculty of Music continues to be diligently prosecuted under Lawrence Walker, Esq., B.A., Mus. Doc., who lectured in the College during the winter on Harmony, Counterpoint, Musical Form and Composition. Under his direction seven chamber concerts were given in the Examination Hall,

at which works of Brahms, Schumann, Haydn, Beethoven, Schubert, Chopin, Liszt, Tchaikowski, Mozart, Grieg, and Wieniawski were rendered. These concerts have proved themselves a great boon to lovers of high class music in Belfast, and are a most valuable means of education to students of the College, who are allowed to subscribe to them at half the fee charged to others.

THE STUDENTS.

The number of students upon our books was again large this Session. The entrances in the Faculty of Arts showed a considerable increase on even the large numbers of the previous year. The Medical students were numerous as usual. The attendance in the Faculty of Law was larger than in the previous session; and that in the School of Engineering less by one. The number of Lady Students was very gratifying. They were distributed over the Faculties of Arts, Medicine, and Music, the largest number being enrolled in Arts, those in Medicine, however, being considerably more numerous than in the previous Session. The exact statistics of each department are given in tables which will be found in the Appendix.

The Examinations for our Studentships, Scholarships, and other honours were, as usual, held at the commencement of the Winter Session, and, in several cases, the competition was so keen and excellent, that the Council awarded special prizes in addition to those which had been announced.

For the first time the very valuable and important Dunville Studentship was won by a young lady. Miss Molynaux, B.A., who succeeded in carrying it off, took her degree the previous week with honours in Mathematical and Experimental Physics. The first holder of the Dunville, when it was instituted thirty-three years ago, was Mr. Joseph Larmor, now Lucasian Professor of Mathematics in the University of Cambridge and Secretary of the Royal Society, and it has been won since by many distinguished men, but never before by a lady. I need scarcely stay to point out the significance of this interesting fact in the history of the advances which have been made in our time in the higher education of women—advances in which this College had the honour to be a foremost pioneer.

In the competition for the Entrance Scholarships a pupil of the Belfast Royal Academy, Mr. James Sinclair Jackson, gained the first place on the classical side, and a pupil of Campbell College, Mr. Robert Victor Hamilton, the first on the Mathematical, while a pupil of the Royal Academical Institution took the only Scholarship in Modern Languages and Modern History, and two other pupils took Classical and Mathematical Scholarships respectively, making three in all from this school. The other schools which sent up successful candidates were the Methodist College, which gained two; Foyle College, Londonderry; the Ballymena Academy, (which gained two); and Upper Sullivan School, Holywood.

For the Senior Scholarships in Classics and Chemistry the competition was so close that in each case the Council gave a special prize to the *prox. access*. A lady, Miss Wedgwood, B.A., gained the Senior Scholarship in Modern Languages and Modern History, and Mr. T. W. McConnell, B.A., in addition to the Senior Scholarship in Ancient Classics, took the Blayney Exhibition, besides having won at the Royal University the previous week a First Class Exhibition with his degree.

The competition for one of the fifth year Medical Scholarships was so close, and the answering so good, that two candidates had to be bracketed together as equal, and the Scholarship divided between them, with a prize added in each case by the Council.

Mr. James Lyttle McKee, B.A., Andrews Student, was appointed, on the nomination of the Council, to one of the Research Scholarships (of £150 per annum for two years) founded by the Royal Commissioners of the Exhibition of 1851, and Mr. Thomas Carnwath, B.A., M.B., to another for a second year.

A new Scholarship has just been established in the College by private beneficence, which is likely to prove of much advantage to those studying for the Medical profession. Mr. Robert Mackay Wilson, Fitzwilliam Square, Dublin, has founded a Travelling Medical Scholarship, open to students who have completed their medical curriculum and are desirous of spending a year of further study at some Medical school or institution abroad, to be approved by the College Council. The value of the Scholarship will be £100 per annum.

The various Scholarships, Studentships, Exhibitions, and Prizes, of public or private foundation, which we possess, amounting altogether in pecuniary value to over £2,500 per annum, have always been of the utmost service to the cause of Ulster education, both as incentives to study, and as affording to such of our young men and women as are not possessed of too large a share of this world's goods, the means of supporting themselves during their College life. There is no reason why, by means of these endowments, and those of the Royal University, such students may not obtain their education here at a very small cost indeed, or even altogether free. Many have done so. It was a wise provision of the State, when the College was founded, to endow it with moneys for this purpose, and the beneficence of generous friends of education has materially and happily augmented these resources.

A list of the honours of various kinds gained by our students during the year, at the examinations of the Royal University and elsewhere, will be found in the Appendix to this Report. To give all here would be impossible.

I may merely mention the following:—

Mr. Herbert Stewart, M.A., gained the studentship in Mental Science (worth £300); Mr. W. E. M. Lewis, B.A., took the similar studentship in Experimental Science; and Mr. W. J. Wilson, B.A., M.B., the medical studentship in Pathology and Bacteriology (worth £400). Mr. R. T. Beatty was awarded a special

prize of £50 for his distinguished answering at the M.A. honour examinations in Physics, and Dr. C. J. Lowry a gold medal for distinguished answering at the M.D. examinations.

The Brooke Scholarship in the King's Inns was gained during the year by Mr. William Lowry, B.A., whose name is thus added to the long list of Belfastmen who have won this coveted prize. At the same examination Mr. James Anderson, B.A., obtained third place and the Society's prize of £21, and at the continuous course examination last month Mr. T. W. Brown obtained the third Victoria Prize in the Senior class.

RELIGIOUS SUPERVISION.

During the Session the College had upon its roll the names of members of all the chief religious bodies to be found in Ulster, and, as usual, the provisions made in the College Statutes, for the supervision of the students and their instruction in the tenets of their respective Churches, were carried out by the several Deans of Residences who have been appointed for that purpose by Warrant under the Royal Sign Manual. At the commencement of the Session each Dean was furnished by the Registrar, according to custom, with a list of the names and addresses of the students belonging to his Church, and I now append the reports which I have received from the Deans as to the manner in which their responsible duties were discharged, and as to their opinion of the conduct of the students committed to their care. I give the reports in the order of the seniority of the Deans. The Rev. W. Hamilton Drummond, B.A., was appointed by Your Majesty, during the year, Dean for the Association of Irish Non-subscribing Presbyterians, and reports for the first time.

"St. Andrew's Rectory,

"University Square, Belfast,

"June 10, 1907.

"DEAR MR. PRESIDENT,—In response to your request of the 7th June instant, I have pleasure in reporting that the increased number of C. of L. students in Q.C.B., has, as in former years, been characterised by most excellent deportment in morals and gentlemanly conduct during the past session. The interest shown by the public of Belfast in aiding the students to supplement College enterprises abundantly testifies to this Report.

"I remain,

"Dear Mr. President,

"Very faithfully yours,

"S. EDW. BUSBY, Clerk,

"M.A., LL.D., T.C.D., Dean, C. of L., Q.C.B."

"College Park, Belfast.

"13th June, 1907.

"DEAR MR. PRESIDENT,—As far as known to me the conduct and character of the Presbyterian students attending Queen's College this session have been satisfactory.

"I am,

"Yours sincerely,

"MATTHEW LEITCH."

" Methodist College, Belfast,

" 8th June, 1907.

" DEAR MR. PRESIDENT.—During the past year, so far as I have been informed, the Methodist students of the Queen's College have conducted themselves in a highly satisfactory manner.

" I am,

" Very faithfully yours,

" WILLIAM NICHOLAS, D.D.,

" Methodist Dean of Residences."

" Clontarf,

" Derryvolgie Avenue, Belfast,

" June 11, 1907.

" I have to report that the students under my charge during the session 1906-7, have given satisfaction, and to the best of my knowledge have been a credit to the College. One of them, a student of considerable promise, has had an unfortunate interruption to his studies owing to severe illness.

" WM. H. DRUMMOND,

" Dean of Residences for the Association of
Non-Subscribing Presbyterians."

THE LIBRARY.

The following report on the working of the Library during the year has been furnished to me by the Librarian:—

" The Library,

" Queen's College, Belfast,

" 1st June, 1907.

" DEAR MR. PRESIDENT.—I send herewith a statement of the additions to the Library, by purchase and donation, during the year ending 1st June, 1907.

" The lack of shelf-space for the collection, now numbering about 60,000 volumes, continues to be a most serious obstacle to the efficient management of the Library. The difficulties to which I referred in last year's report have increased, and they must increase with each year's influx of books. It is to be hoped that means will soon be found for carrying out the plans which have been prepared by H. M. Board of Works for an extension of the building at the west front.

" Arrangements have been made for the completion of the card-catalogue. Additional cabinets for the catalogue, a safe for library records and MSS. deposited on loan, and a barrier for the separation of the tables of the assistants from the reading-desks in the Great Hall, are about to be installed by H. M. Board of Works.

" Five Readers have been granted facilities in terms of the recent Regulation (No. 12).

" I have pleasure in reporting that Mrs. MacDonall, widow of Professor MacDonall of this College, has intimated her intention to bequeath the remaining portion of her late husband's library to the College, and that her generous offer has been accepted by the Committee.

" I remain,

" Yours very sincerely,

" G. GREGORY SMITH.

" To the Rev. the President,

" Queen's College,

" Belfast."

I most strongly emphasise the statement of the Librarian as to the urgent necessity for an enlargement of the building. In his report to me last year he said:—

"The Library has now outgrown the building, and serious confusion has arisen in some of the departments. In several there is no room for the addition of a single new volume; in others the small space available has been occupied by 'overflows' from neighbouring sections. Before the Council sanctioned the closing of Reading-room No. I., many volumes lay in stacks in the alcoves of the Gallery. This Reading-room is now full, and long sets of *Hansard's Reports*, *Revue des Deux Mondes*, and other works have been laid on the Gallery floor, against the east and west walls. In another year we shall be, at our present rate of increase, in no better plight than we were before the acquisition of the Reading-room. A special Committee of Investigation has reported that they view this acquisition 'only as a temporary relief, and that the larger question of an addition to the Library accommodation must be seriously considered.' "

If the state of matters last year was so bad, it is clear that the situation is now much worse. Urgent representations have been made to the Treasury on the subject, and it is to be hoped that before very long the necessities of the case will be recognised and adequately dealt with.

During the year there were added to the Library 1,335 publications, and the number of volumes bound was 487, making 1,822 altogether. The annual rate of increase in the contents of the Library is sufficient indication in itself of the necessity for larger accommodation. The total number of volumes on the shelves is now about 60,000. The number of literary and scientific journals subscribed for is 157; 73 of these being English and 84 foreign. These periodicals, which are quite indispensable for purposes of research and advanced study, are eventually bound and placed on the shelves for preservation and reference.

A large number of volumes were presented to the Library during the year. In the Appendix a full list of these will be found, and I must express, on behalf of the College, our great indebtedness to those thoughtful friends to whom we owe these additions to the contents of our book cases.

The Library Committee for the year consisted, in addition to the Librarian and myself, of Professors Dougan, Freund, Park, Dixon, Letts, Gregg Wilson, Symington, Milroy, and Lindsay. They met monthly, and were most assiduous in their attention to the duty committed to them.

The Better Equipment Fund made the Library a grant of £300 for the purchase of books. This was a most welcome addition to its resources, and I am happy to say that a grant to the same amount has again been given for next year.

THE MUSEUMS.

The various museums were carefully maintained, under the charge of their respective curators, during the year.

Respecting the Natural History Museum, Professor Gregg Wilson reports that many additions were made to its contents and that it was in constant use during the session.

Of the Medical Museum Professor Symington reports:—

"The Medical Museum continues to receive additions to its treasures through the thoughtfulness of members of the profession. A large number of osteological specimens have been mounted during the year, and Professor Elliot Smith, of Cairo, has presented a most interesting series of Egyptian brains."

The Materia Medica Museum has been practically rebuilt during the year, and is much enlarged, entirely refitted, and greatly improved in other ways.

For the Museum of Hygiene, which has hitherto been inconveniently housed in a portion of one of the chemical laboratories, a large new apartment has now been specially provided, into which the entire collection of exhibits will shortly be transferred.

A new room for a Museum of Chemistry has also been erected. It will be supplied with a collection of specimens and apparatus, which will be sure to serve many useful purposes.

THE LABORATORIES.

In no respect has the recent progress of the College been more marked than in the large augmentation of our Laboratory accommodation. Twenty years ago we had but one laboratory, and this, in the year 1889, was condemned by the local health authorities as insanitary. To-day we have no fewer than eight, all of them excellent buildings, spacious, well-ventilated, well-lighted, and fitted with appliances and apparatus of the most modern type. During the past year a notable addition was made to this provision—the most notable since the establishment of the College. This improvement was effected through a grant by the Treasury of £5,400 for new buildings on condition that a corresponding sum of £5,400 was contributed by the Better Equipment Fund, to which the College has owed so much during the recent years of its history: This sum was given by the Fund, and we now possess the following:—

(1.) "The Donald Currie Laboratories," named after our great and munificent benefactor. These are devoted to chemistry and, in addition to laboratories proper, contain practical classrooms, rooms for gas and water analysis, dark room, balance room, chemical museum, and a large and beautiful new lecture theatre, with preparation room adjoining, the whole lighted by electricity. At the present time, and in a city which is the seat of so many manufactures and industries, it is obviously of the greatest importance that the College should possess these extensive and well-equipped buildings.

(2.) "The Musgrave Laboratories," named after the late Sir James Musgrave, Bart., to whom the department practically owes its existence. These are devoted to research and teaching in Pathology and Bacteriology under the Musgrave Professor of Pathology, whose chair was founded by Sir James. He is assisted

by the Riddel Demonstrator in Pathology and Bacteriology, whose office was munificently endowed by the Misses Riddel. The proceeds of a gift of £1,000 from Mr. Henry Musgrave help in the maintenance of the department, which is necessarily expensive. These laboratories, now in course of completion, contain all sorts of rooms for research, practical work and teaching, with requisite appliances and apparatus. No laboratories play a larger or more important part in ministering to the health of Belfast and the instruction of our future race of medical men.

(3.) "The Jaffe Laboratories," named in honour of Sir Otto Jaffe, to whom, as to Lady Jaffe and Mr. John Jaffe, not only the College but the city owes so much. These buildings will be completed, we hope, in time for the work of next session. They contain lecture rooms, rooms for practical work in Physiology, Physiological Chemistry and Histology, private research rooms, centrifuge room, dark room, &c., &c. Never before had we anything like the equipment which we shall now possess for prosecuting research, and conveying instruction, in Physiology and its allied sciences.

(4 and 5.) "The Harland Laboratories," named after the late Sir E. J. Harland, Bart., M.P., whose name is so deservedly honoured in Belfast, and whose widow united with two of her lamented husband's partners, Lord Pirrie and Mr. G. W. Wolff, M.P., in providing the funds for their erection. These laboratories are devoted to (1) Natural Philosophy, and (2) Engineering, under the respective professors and their assistants, and contain lecture theatres, practical class-rooms, workshops, laboratories proper, drawing office, research rooms, &c. It was nothing short of a scandal that, until their erection, we possessed no laboratories for research and practical instruction in these subjects. Already the value of the new buildings has been abundantly proved, and it will undoubtedly be more and more apparent as the years go on.

(6.) The Biological Laboratories contain large and well-lighted rooms, both for senior and junior students, in Zoology, Botany, and Geology, together with research rooms and a lecture theatre, all in close proximity to, and communication with, the Natural History Museum. It would be impossible to say how much the erection of these laboratories has added to the efficiency and value of the department.

(7.) The Pharmaceutical Laboratory occupies a room formerly devoted to Engineering, which department is now transferred to better quarters in the new Harland Laboratory. This laboratory is completely fitted with necessary appliances, and is under the superintendence of the Professor of Materia Medica and his assistant. It affords every facility for the practical instruction of medical students in pharmacy, and the dispensing and compounding of medicines.

(8.) A well-fitted and constantly used Anatomical Laboratory for microscopic and photographic work.

It is a matter for great satisfaction that the College has made this notable advance in its provision for practical scientific work and teaching—so important, and so essential for the age and the

city in which we live. If for nothing else, the past score of years deserve for this reason to be marked in our annals with a white stone. To me it has been an unspeakable joy to see, during my years of official life here, range after range of spacious and beautiful buildings rising in our grounds in quick succession, each the destined home of some great science, or the scene of the labours of an inspiring teacher by whom the flame of devotion to learning may be kindled year after year in the breasts of successive generations of young Ulstermen, long after those who built them have been laid to rest in the last, long sleep.

In connection with the naming of the laboratories above mentioned, I may be permitted to append the following letter:—

“Office of Public Works,
“Dublin, 22nd February, 1907.

“SIR,—I am directed by the Commissioners of Public Works to acquaint you, for the information of the College Council, that, as the buildings, being erected at the joint expense of the Exchequer and the College Equipment Fund, are now well advanced towards completion, the Board think it desirable to obtain a formal record of your Council's approval of the names which have been assigned to the various buildings. In accordance with what the Board understand to be the general desire, they have caused the names of Sir Donald Currie, Sir Otto Jaffé, and Sir James Minnegrave, to be inscribed on the several groups of buildings, and they direct me now to ask that your Council's approval may be given to these names.

“In addition to the buildings whose expense has been divided between the Government grant and local contributions, the Board are also erecting, as you are aware, a railing round the College, with a gate lodge and tower; the cost of these works is to fall entirely on the funds provided by the Treasury. The Board thought it would be a suitable method of commemorating the term of office of the present President to inscribe his name on the gate-tower, and they would be glad to be informed that your Council concur in this view.

“I am, Sir,

“Your obedient Servant,

“H. WILLIAMS, *Secretary*.

“The Registrar,
“Queen's College,
“Belfast.”

The Council at once concurred in this proposal, and, for myself, I need scarcely say that I greatly appreciate the graceful, though much too appreciative, compliment so kindly paid me by the Commissioners of Public Works. I feel it no small honour to have my name permanently inscribed in the College where I spent my student days, and which has, from that time till now, occupied an uppermost place in my thoughts and affections.

HONOURS TO OLD STUDENTS.

During the year it pleased Your Majesty to confer the honour of knighthood upon one of the ablest and most widely known members of the Medical Faculty, Professor, now Sir John, Byers, and the announcement of this distinction was received with much pleasure not only in the College but by many outside its

walls. No member of the staff devotes himself with greater assiduity, zeal, or success, to the discharge of his duties in the Lecture-room, the Royal Victoria Hospital, and the Maternity. Nor are his services to Queen's College confined to his own department. As an old student, as well as a professor of the present time, he has often shown his concern for its welfare and reputation, and done what he could to advance its interests.

One of our most distinguished *alumni*, who has frequently proved that his interest in his *alma mater* is by no means a thing of the past, Mr. Serjeant Dodd, was, during the year, to the great pleasure of us all, appointed one of Your Majesty's Judges in Ireland. If, in an official document such as this, I may be pardoned for introducing a personal reference, I should like to say that, in addition to our satisfaction, as a College, at the bestowal of this honour, it was to me personally a sincere pleasure to hear of such a high and most honourable office having been conferred upon an old school fellow and College companion.

Mr. J. O. Wylie, K.C., has been appointed Judicial Head of the Irish Land Commission—a fitting tribute to his high professional eminence, which gave great pleasure in his old College.

Mr. C. W. L. Alexander, B.E., a former distinguished student, was, during the year, appointed to the Chair of Engineering in Queen's College, Cork; Mr. R. A. Williams, B.A., to the Chair of German in Trinity College, Dublin; Mr. John Hawthorne, B.A., to the Head Mastership in Chemistry in the Belfast Municipal Technical Institute; Mr. T. B. Vinycomb, M.A., to the post of Physics Master in the Woolwich Polytechnic; Mr. Robert Magill, M.A., to the Principalship of Halifax College, Nova Scotia; and Mr. John G. Leatham, M.A., to the University Lectureship in Mathematics in Cambridge. Mr. Gerald Hoey Stevenson, M.B. took first place at the R.A.M.C. Examination, where Mr. W. Brooke Purdon, M.B., and Mr. Malcolm Orr Wilson, M.B., also secured good places. Mr. John Johnston, B.A., took second place at the Examinations for the Indian Civil Service.

THE STUDENTS' SOCIETIES

appear to have had very useful and successful sessions during the year.

The Literary and Scientific Society has completed the fifty-eighth year of its history, having been founded in 1850, with, as its first president, Mr. Edwin Godkin, an old student of whom the *Athenæum* spoke the other day as "the brilliant Irishman who, through nearly the whole of his working life, was the greatest and worthiest journalist in the United States, having few equals, and perhaps no superior, on this side of the Atlantic." The president of the Society for the past year was Mr. A. A. Rutherford, B.A., LL.B.

The Medical Students' Association had a session which will be memorable on account of a visit kindly paid to it by Professor Schafer, of the University of Edinburgh, who delivered an address which will be long remembered. The president for the year was Dr. W. J. Leighton.

The Union Society continues to discharge its functions with much zeal and success. The president last year was Mr. A. H. Joy. The membership is large, but I shall not be satisfied until every student enrolls himself as a member of the Union when he enters the College. For his own comfort and convenience, and, still more, for the sake of the valuable education received within its walls through association with fellow-students, every man should do so.

The entire interior of the Union was renovated during the year, and several important structural improvements were carried out at considerable cost, which will, doubtless, redound to the happiness of the members. A reciprocation of privileges has been arranged with the Edinburgh University Union, which, it is hoped, will prove of advantage to those members who may have occasion to visit the Scottish metropolis.

The Students' Representative Council, founded in 1900, had for its president Mr. James Ferguson, B.A. It spent a busy and eventful year, and is proving itself more and more useful in furthering the interests of its constituents.

Other students' societies and clubs are—The Christian Union, the Football Club, the Athletic Club, the Hockey Club, the Tennis Club, the Gymnasium Club, the Swimming Club, the Golf Club, the Cricket Club, and the College Gaelic Society, and their number and activity attest the large amount of corporate life which now prevails among the students, and which manifests itself in so many varied forms.

The president of "The Association of Old Belfastmen in London" this year was James Chambers, Esq., M.D., and the Honorary Secretaries, Messrs. J. A. Strahan, LL.B., and S. P. Ker, B.L. The Association continues to serve a very useful purpose in bringing together old students who desire to keep in touch with their College.

I have had occasion several times in the course of this report to refer to the

BETTER EQUIPMENT FUND

of the College, and to the advantages which almost all our departments have derived, and are continuing to derive, from its work. The moneys of the Fund have now been finally invested in the hands of Trustees. A Trust Deed and Scheme for its management and administration were drafted by Mr. R. T. Martin, Solicitor, settled by Sir Hiram Wilkinson, Judge Shaw, and Mr. J. R. Fisher, approved by the Executive Committee of the Fund, and the General Committee, and duly signed. The trustees-appointed are The Right Hon. Thomas Sinclair, Sir Otto Jaffe, Sir Hiram

Wilkinson, Sir William Crawford, Mr. Henry Musgrave, Mr. James Taylor Blackwood, and myself. Before the Fund was transferred into their names, the accounts, from its inception in 1901, were audited by Messrs. Stewart Blacker Quin and Co., Chartered Accountants, who have kindly consented to act as Honorary Auditors. The total amount raised was found to be £70,175 1s.—a sum on which all concerned may well congratulate themselves, and which will go on, year by year, yielding, by the interest accruing from it, valuable support to many departments of our College work, and thus helping materially, as it has already done, to render the higher education of the North of Ireland more thorough and efficient.

But this is not the whole tale of the achievements of the Fund. If to the amount mentioned above, as directly subscribed to it, we add the benefactions to the College of which it was the occasion, we reach a total little, if at all, less, than £100,000, all raised within a comparatively small number of years, and all fruitful, in various ways, in great good to the College.

I have placed in the Appendix a list of the office bearers of the Fund. Their names deserve to be held in grateful and everlasting remembrance, as do those also of all the subscribers who so generously aided this great and noble enterprise.

AN ATHLETIC FIELD.

During the past year a large section of the Belfast public have been working sedulously, and most kindly, on behalf of another College project. When Sir Donald Currie paid us a memorable visit on the 30th June of last year, finding that one of the unsupplied needs of the College was an Athletic Field, he generously offered to give the fourth part of the £5,000 which it was estimated that such a field would cost, provided the remaining three-fourths were raised within a year. Forthwith, a number of ladies took the matter in hand and set about organising a Fancy Fair and Fête, in order to raise the needful money. At once they found a large amount of public sympathy and support. All through the winter preparations for the great event went busily on, and on the 29th, 30th, and 31st May last, and 1st and 3rd of June, the Fête was held. Unfortunately, the weather was anything but propitious, but, with unflinching courage, the ladies held on bravely to their self-imposed task, and the results, if not what they undoubtedly would have been under kindlier climatic conditions, were exceedingly gratifying.

At the opening ceremony, which was gracefully performed, in the very regrettable absence of Sir Donald Currie, who had kindly promised to officiate on the occasion, by Mrs. Wisely, his daughter, the Marchioness of Londonderry delivered one of those noble and most informing speeches by which she always charms those who have the pleasure of listening to her. Others who took part in the proceedings on this or a subsequent day, and spoke wise and weighty words, were the Dowager Marchioness of Dufferin

and Ava, the Countess Annesley, Mrs. James McCalmont, the Right Hon. Thomas Sinclair, Sir William Whitla, Sir James Henderson, Sir William Crawford, and Sir John Byers. Some of the speeches had a special value, because of the important light which they cast upon the question of the use and importance of physical education in the training of youth.

In the Appendix I have placed the names of the various ladies and gentlemen who managed this enterprise, of the Executive Committee, and the several office-bearers and stall-holders. They deserve to be recorded; as also does the kindness of all who, in other ways, helped the project so willingly and generously.

MISCELLANEOUS.

In September last the College was represented at the celebration of the quater-centenary of the University of Aberdeen by Professor Sir William Whitla and myself.

In November I appeared in London, at the request of "The Royal Commission on Trinity College, Dublin, and the University of Dublin," and, in the name of this College, gave evidence as to the most advisable settlement of the Irish University difficulty. This evidence is contained in the Report issued by the Commission, so that it is not necessary further to allude to it here. Neither need I discuss the general question of University Education in Ireland, as it has been announced that Your Majesty's Government intends dealing with it during next Parliamentary Session. This only I shall say, that I do most devoutly hope that we shall, at as early a date as possible, see the solution of this difficult problem wisely and courageously attempted. This College, and the entire higher education of the country, have long suffered most seriously from the defective national provision for this purpose, and must continue to suffer until Parliament places it upon proper lines.

We are to be represented this year at the celebration of the centenary of the Geological Society of England by Miss Mary Andrews, an accomplished geologist, daughter of the late Vice-President of this College, Dr. Thomas Andrews, F.R.S.; at the Conference of the Royal Sanitary Institute in Dublin by Professor Letts; and at the Conference on School Hygiene in London by Professor Sir William Whitla.

All further details regarding the work of the College during the past year will be found in the Appendix.

I have the honour to subscribe myself

Your Majesty's most dutiful servant,

THOMAS HAMILTON.

July, 1907.
